A NON-PROFIT EDUCATIONAL ORGANIZATION

About Our Programs

Wildlife Associates is a non-profit organization based in the San Francisco Bay Area. We are nationally recognized for our exciting, dynamic and safe wildlife presentations. During the school year we reach 300,000 students in Northern California. Since 1980, over eight million children have participated in our educational programs.

We operate year-round with a staff of professional wildlife specialists and environmental educators. All programs are age appropriate. Programs for children 5-8 last 35-40 minutes. Programs for older children and teens last 40-45 minutes. They can be held either indoors or outdoors. Our programs are self-contained so there is little or no preparation required on your part.

All the animals in our programs came into our care because they are non-releasable, as they were abandoned, injured or born in captivity. They can never survive on their own in the wild, and these special animals stay with us their entire lives. As true "Wild Teachers" they help to nurture empathy and compassion for all life while teaching the nature of science.

The excitement and educational value of seeing these beautiful wild animals is an experience that lasts a lifetime. Large or small groups, young or old, our programs captivate and enthrall everyone!
